

**Notice Type:**

Train Operating Conditions (TOC) Waiver

**Subject Title:**

Update to TOC Section 10 Locomotive and Rolling Stock Data – Explanation of Notes

**Effective From:**

22/09/2025

**Effective To:**

22/03/2026

**Reference Documents:****TOC Manual:**

Section 10

**General Details / Operating Condition:**

This Waiver supersedes the 'Explanation of Notes' with Section 10 of the ARTC TOC Manual 'Locomotive and Rolling Stock Data'. This TOC Waiver also supersedes TOC Waivers 25023. Until further notice the relevant section, 'Explanation of Notes', has been stood down and this is the single source for 'Locomotive and Rolling Stock Data' 'Explanation of Notes' thus all TOC Waivers that refer to the 'Explanation of Notes' shall have any details superseded by details provided below.

In addition, all vehicle speed classes are no longer link the vehicle loading to the speed for any particular ARTC route.

Unless a maximum operating speed has been noted on the vehicle registration, the maximum vehicle speed is to read as the "max speed" for the registered "Speed Class".

Registered Speed Class <sup>3</sup>	A	B	C	D	E	F	G <sup>1</sup>
Max Speed (km/h) <sup>2</sup>	115	100	80	65	80	65	60

**Notes:**

1. Maximum vehicle speed of 60km/h for "G" category (30 tonne axle load) vehicles applies unless there is an applicable "Special Access Condition" within the appropriate ARTC Route Access Standard (RAS) Section Page.
2. If applicable Route Capacity for the axle load and section is less it shall govern the maximum vehicle speed, refer to the Route Capacity tables in applicable ARTC RAS Section Page

**BW Vehicle Must be Block Worked**

Vehicles that:

- Cannot activate track circuits reliably, and
- Are not signal compliant, and
- Shall operate under "special working" as applicable by the safeworking rules.

**TCA Vehicle operates with Track Circuit Assistors (TCA)**

Vehicle is fitted with TCA, refer to ARTC RAS General Information section 2.14 for detailed operational requirements.

**BRAKE NOTES****B1** Any position in the first 900 metres of train**B2 & B3** Any position in the first 1500 metres of train**B4** Any position in train**ECP & E1** Any position in ECP train (all locomotives and wagons ECP braked)**••** Indicates that the vehicle is fitted with a "two pipe" air brake system. The main reservoir air recharges the air brake system.**•□** Indicates that the vehicle is fitted with a main reservoir pipe but it does not recharge the air brake system. This vehicle can be marshalled anywhere in a two pipe train but is not categorized as a "two pipe" vehicle**Approval:**
